

Pine Bark Beetle Don Jackson, Growing Season, Inc and Pete Stock, D & S Tree Service in Show Low, AZ. treating a beetle infested trees at Vernon Arizona LDS Chapel with the VPX 75 & 80. Beetles were in the trees as the trees were not healthy enough to produce sap to expel the beetle. After adding VPX 75 & 80 to the Ponderosa Pines using the Basal Flare Method and foliar spraying Vita Agri/VPX Booster, the trees started producing sap which enabled the tree to expel the beetles. Trees are healthy today!
