

Pictures of Vita treated trees in Fraser, CO

“These pictures of trees I told you about up the road. This is amazing to see sprouting of limbs off the trunk...unheard of! Pearl City treated these several times in the ground and foliar last year and this year. The trees were almost gone and will come back now in the next couple of years with a vengeance-from the dead. I hope you continue to be aggressive with the schedule I laid out. Anything short of that is not utilizing the product fully. Remember minute amounts multiple applications is the way this product works the best much like we take vitamins for our bodies, it's not an injection or vaccination but a supplement to cure the soil and feed the plant which can only take up what it can use in the very short term until the energy is turned back around.”
