

“Palmetto Dunes Fazio #5 and everything is green and everyone is happy.” Emanuel B.

They had a problem with nematodes on the entire course and just used methyl bromide on the fairways. We asked them if we could try the Vita Agri/VPX Booster on the green before they went to MB. They agreed and you can see the circle getting smaller and the green healthier. They ran a sample of the green and there was no evidence of any nematodes. We tried to get a copy of the results but they were unable to find them.
