

### **Grower in Colorado-**

**Colorado grower of Hops and Alfalfa has been using Vita Agri Plus for many years now on his alfalfa but just last year on his hops. The Vita saved his hops and also saved another hops grower who has a contract with Coors. His hops were the only hops growing in Colorado at the end of the year last year. All others were dormant. He got 5 cuttings for his alfalfa and the norm is 3 in Colorado. He has never had this many cuttings before. Another plus is no insect problems on his crops and no mosquitoes!**
